

Instructions to run the Teaching Kit examples:

1. Make sure you have installed Flux (min V 10.3) on your computer / laptop
If you don't have Flux (min V 10.3) yet, you can request an evaluation file at university@cedrat.com
2. Extract the example files on your computer (.zip)
Please don't rename the file
3. Open the Excel file
4. In the Excel file, you can change the varying parameters on the right and click on "solve with Flux" to run the simulation.
5. The description of the case is available in the Excel file by clicking on "case description"
6. Click on "Access to Flux" to open the Flux software
